

Assignment – 2 (Part 1 - Tables Template)

- No restriction on table length or word count.
- Convert to PDF before submission on canvas

(Solo) Student Name:	ABC123:
Group (if worked as a group)	
Student Name: Durga Jhansi Yerukala	ABC123: SCP203
Student Name: Jasen Daniel Drileck	ABC123: VHA667
Student Name: Vyshnavi Sai Yadlapati	ABC123: FPL006

Table 1: Linear Search	
Number to search	Time (Sec)
1	0.062500
500	0.046875
900	0.078125

Table 2: Sorting	
Sorting Algorithm	Time (Sec)
Bubble Sort	0.046875
Merge Sort	0.062500
Quick Sort (Pivot as first index value)	0.062500

Table 3: Binary Search	
Number to search	Time (Sec)
1	0.046875
500	0.046875
900	0.078125

Table 4: Results			
Algorithm	Number 1 (sec)	Number 500 (sec)	Number 900 (sec)
Linear search (Sec)	0.062500	0.046875	0.078125
Bubble Sort + Binary search	0.093750	0.093750	0.125000
Merge Sort + Binary search	0.109375	0.109375	0.140625
Quick Sort + Binary search	0.109375	0.109375	0.140625

Based on the experiment the best (in terms of time) is: __Linear Search__
